

# BOOTGUN

*If you've ever tried to replace the CV boots on a car, you will appreciate just how difficult it is to actually get the boot onto the drive shaft. Although we can't do anything about the stripping down of the wheel and wheel hub, we can make life easier when putting on the boot itself. This ingenious tool, operated by air, opens up the flexible boot effortlessly and evenly allowing simple insertion onto the shaft, totally eliminating the need for lubrication and the struggling involved with the old fashioned method.*

- ✘ **Air powered** – Reducing fitting time by up to 90%.
- ✘ **No additional lubricants needed** – Due to its unique operation the boots need no additional lubricant to allow fitting to the vehicle.
- ✘ **Made from glassfilled nylon** – Maintenance free and works on compressed air (8 Bar max).
- ✘ **The BOOTGUN is suitable for all flexible CV boots** – With a diameter of 15-115 mm.
- ✘ **Simple open/close push button** – For one hand operation and controlled opening. Easy to use.
- ✘ **BOOTGUN comes completely assembled and tested OK.**
- ✘ **No need for large air supply** – Operates from compressor with only 9 litre receivers.
- ✘ **Two year warranty** – For extra peace of mind.
- ✘ **CE certified and GS approved.**
- ✘ **Air adaptor included.**
